MAJESTICA, the symphonic and power metal band from Sweden, is set to embark on an exciting new journey with their upcoming album *Power Train*, scheduled for release in February 2025. This spellbinding experience awakens sleeping dreams with powerful riffs and epic choruses in singles such as "Power Train," "Battle Cry," and "A Story in the Night." The enchantment rises like a breath of stars, propelling listeners into the heart of a fairytale world.

Back in 2019, **MAJESTICA** made a significant impact in the metal community with their debut album, *Above The Sky*. This album showcased their signature blend of soaring melodies and powerful instrumentation, quickly gaining acclaim and amassing over 17 million streams. It established them as prominent players in the power metal scene, setting high expectations for their future work.

In 2020 then, the band delighted fans with a unique release: a Christmas musical power metal album titled *A Christmas Carol*. This project beautifully intertwines the classic tale of Ebenezer Scrooge with their symphonic power metal style, drawing inspiration from artists like RHAPSODY and film composers such as Alan Silvestri and Danny Elfman. The album not only highlighted their musical versatility but also offered listeners a captivating retelling of the beloved story, complete with orchestral elements and theatrical storytelling.

Musically, fans can expect real power metal with an even more symphonic and epic sound in *Power Train*. **Tommy Johansson** describes: "You can expect to hear an explosive and very melodic Power Metal album with a lot of catchy melodies, epic guitars solos, strong power metal vocals with fast, but

also heavy drums!". The album features ten brand new tracks, which showcase especially musically a natural evolution and growth in style and skill compared to the previous albums, giving their fanbase exactly what **MAJESTICA** are known for and doing the logical next step in their career. "*We've taken the melodies and the Power Metal elements from our first album and mixed it with some of the choir and orchestral arrangements from the last one - perfect mix!*" adds **Tommy**.

When it came to the process of recording and putting all the pieces together, the band did not change a lot compared to the last projects. Again the music was written, recorded, and produced by **MAJESTICA** themselves. "*Like our previous albums this one is also produced by ourselves, and we recorded most parts in our new place "Majestic Studios". For mixing we went back to Jonas Kjellgren as we have been very happy with the sound of 'A Christmas Carol' and 'Metal United'"*" says bassist **Chris Davidsson**.

Regarding the amazing artwork for **Power Train**, **Chris** explains: "*For the artwork we teamed up with Jan Yrlund / Darkgrove design. It invites you to join this majestic ride of the Power Train, imagine standing there on the platform eagerly waiting, and you hear "all aboard!"*".

With **Power Train** launching on February 7th 2025, **MAJESTICA** continues to evolve their sound and connect with their ever-growing fanbase. Fans can catch **MAJESTICA** on tour in Europe in December 2024, and look forward to appearances at notable festivals in 2025, including Epic Fest, Metalfest and Time to Rock. They will also perform in the USA at 70,000 Tons of Metal and ProgPower, where fans can have legitimate hopes that **MAJESTICA** will also play a few new tracks live from **Power Train**.
